New accessories

Now available on the price list new accessories

T-Con - T connection for PCB 3/12 Led

New T connection device for PCB 3/12 Led, that facilitates the installation in series.
It has been designed as an alternative to the HUB and is completely compatible, allowing a serial connection of several PCBs. Each T-Con supports 1 PCB (2 at the end of line, see schematics below). T-Con is available in two versions: one with metallic cover, coemar code E038, and one without casing, coemar code EL0906431.

Kit wide angle for MiniCyc

New angle widening kit for MiniCyc that noticeably increases the angle of projection of the beam of light and it allows the fixture to operate at very small distances from the walls to be lighted.
