Kit CO9136 – Infinity Wash XL

Package contents:

- 1 Cod. LE1507/1L PC lens
- 1 Cod. 260.318ASM mounting ring
- 3 self-locking nut

Needed tools:

- Star screwdriver
- Flat screwdriver
- n°7 wrench

This kit contains all the material needed to mount a PC lens on Infinity Wash XL instead of default Fresnel lens and to change beam characteristics. We recommend to read and follow carefully these instructions in order to complete the operation without effort.

Warning!
The following instruction must be undertaken by experienced technical personnel.
Always disconnect the fixture from main power before operate.

Instructions to make the upgrade:

- Disconnect Infinity Wash XL from main power and from signal, remove upper and lower cover from the body uncrewing the proper screws. Eventually, fix the tilt movement turning the handle on the side of the yoke.

- Remove the three nuts which keep in site the lens and its support ring. Remove and store the Fresnel lens and its ring; temporary remove or fix with adhesive tape the three washers sited under the lens to avoid lose them.
- Remove all the weights from inside and outside the main frame.

- Put the lens in the new mounting ring’s seat and fix in place. There is only one way to mount the ring: the following images explain how to proceed.
- Fix the three nuts supplied in the kit tightening them uniformly.

- Check that the lens is firmly fixed, check for loose parts, then mount the covers on the fixture.

**WARNING!**
Ensure that the flat back side of the lens is perfectly parallel to the front side of the fixture.

**Notice:** Coemar declines any claim for damages to fixtures and kits caused by wrong assembly or inadequacy.
