Coemar strengthens its presence in Korea

Korea - Following the signing of a new agreement, C&C Lightway will distribute Coemar products in Korea as an exclusive supplier and dealer.

"I'm delighted with this agreement with C&C," states Salvatore Grillo, director of Coemar S.p.A. "It's the result of a close synergy between the two parties. For Coemar this means being able to set up a stable partnership with a highly qualified company operating in Korea, a rapidly-growing market for applications for entertainment and infrastructures. In the latter sector Coemar is gaining an increasing market share with lines of dedicated products."

"We're very proud to have finalised our partnership with Coemar, a prestigious name that will play a leading role in our already excellent business in Korea," comments H.M. Chung, managing director and president of C&C Lightway.
