ReLite LED Kit DIM

ReLite LED Kit DIM T/D Led Module with G22 pins

Introducing

● If you want to **switch your TV studio or theatre from halogen to LED**, the ReLite Series is the perfect solution for you. **Easy retrofitting, excellent white light quality, huge power savings** with almost **no heat generated** and **long life LED lamps** are just some of the advantages offered by our ReLite Series.

The new ReLite Led Kit is the retrofit solution to **every old halogen fixture**, since the LED socket is adaptable to every projector. This retrofit LED lamp shows an **improved light output compared** to the standard ReLite versions thanks to the external box: this technology enables to keep all the electronics of the product outside the fixture, thus avoiding the overheating of the projector.

With the **ReLite Led Kit DIM version**, the light source will be **controllable via traditional TRIAC/IGBT dimmers** (through a potentiometer on board) **and by DMX** with full digital settings. This retrofit solution has been designed for all installations where traditional dimmers are still in use.

Tungsten and Daylight versions available (CRI 90 or Studio version with CRI > 95).
